

How I
would
implement
Erasmus
priorities
during my
internship

~Wiktoria

Priorities
Getting into Erasmus
is one of my biggest
dreams. I'm highly
motivated to
overcome my
language barrier, build
international
friendships and
develop both
professionally and
personally

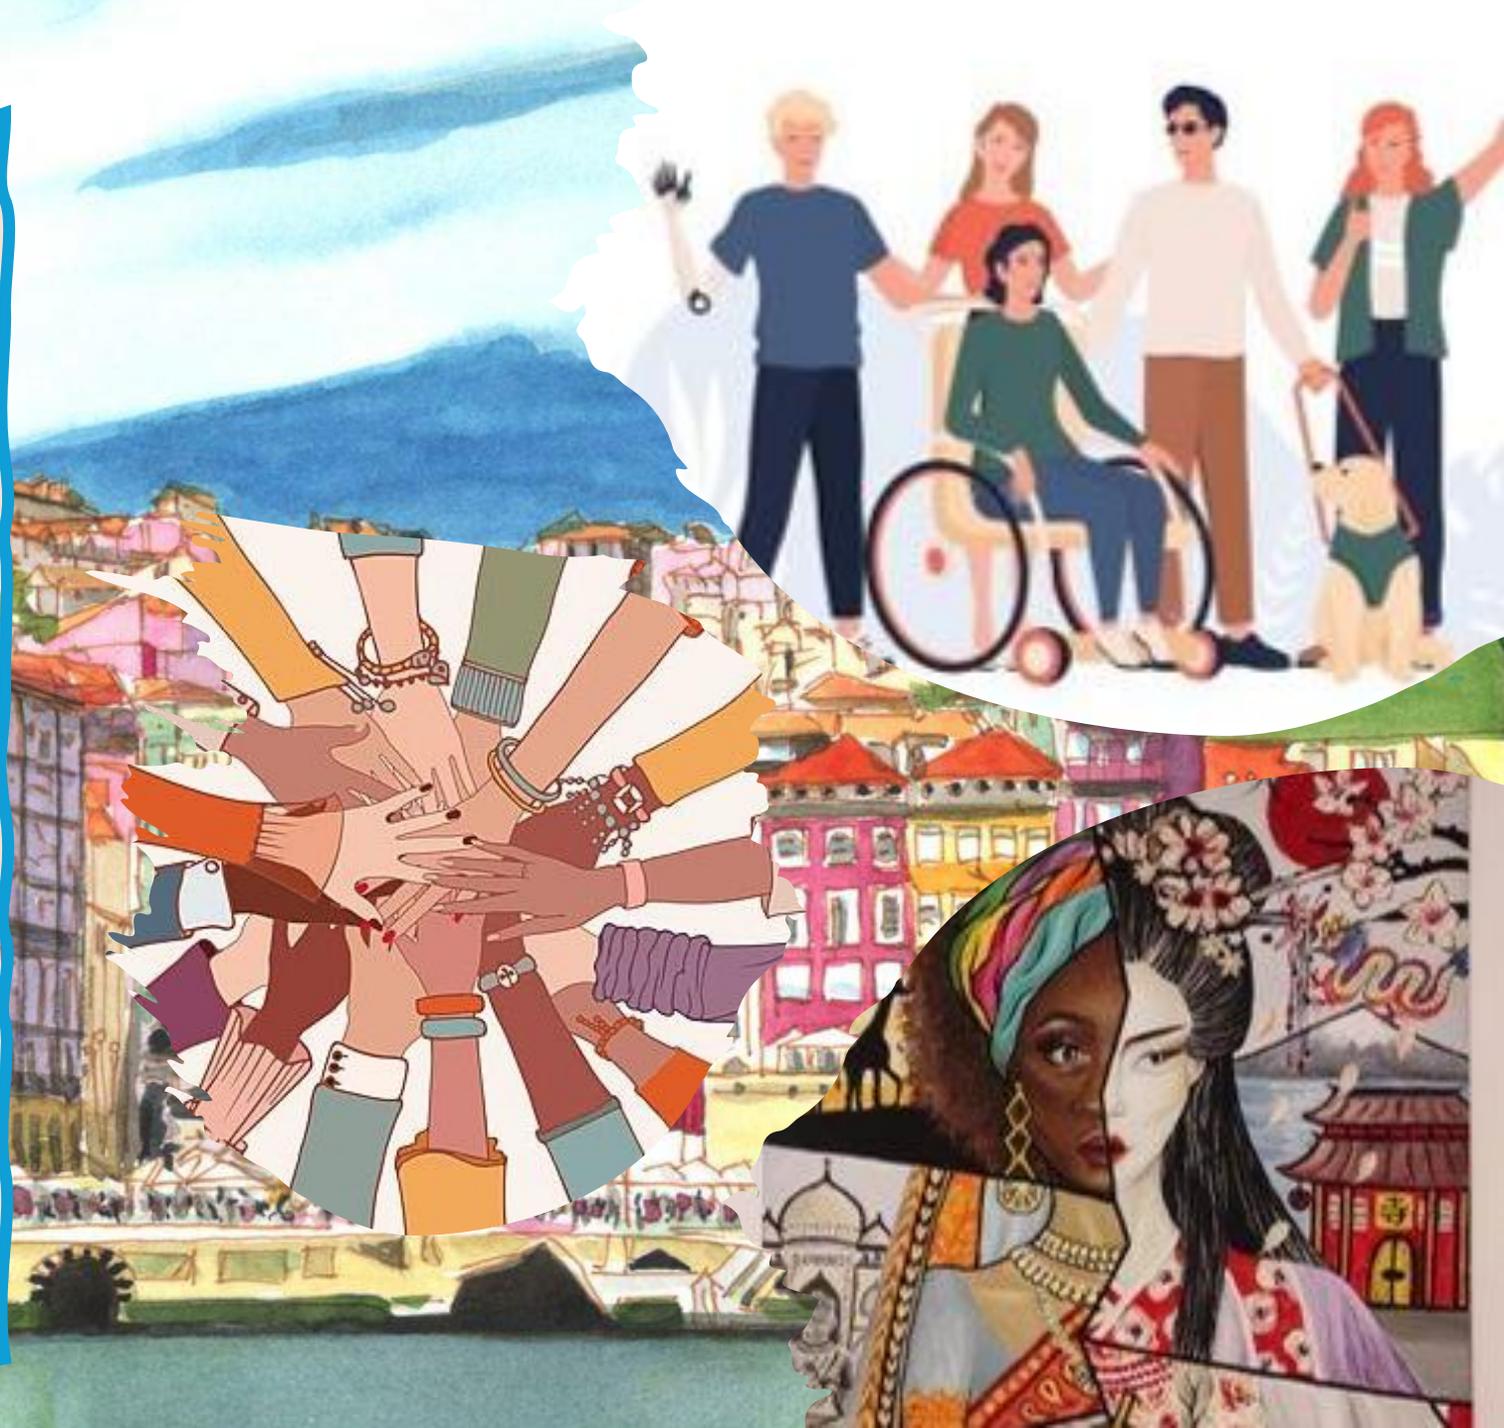

During the project,
we will gain
knowledge not only
in the field of
veterinary medicine,
but also in the areas
of tolerance, equality,
ecology,
digitalisation and
democracy.

Tolerance and equality

I am excited about the opportunity to broaden my horizons in the area of tolerance and equality, including understanding and supporting people with disabilities. Meeting people from different backgrounds will help reduce my ignorance and remind me that we should all treat each other with kindness and support one another.

It's wonderful that everyone can get involved in this project, regardless of what family they come from, where they come from, whether they are wealthy or perhaps have no family. During the project, we can unite and become one big family for the duration of the project.

Ecology

To protect the environment during the project, we will travel together on one bus. After work, I would definitely travel around Portugal on foot, enjoying views or I would sort use public transport.

I would definitely sort my rubbish and try to use eco-friendly packaging as often as possible.

Using technology

During my internship, I will definitely use GPS applications so that I don't get lost in an unfamiliar country. Note-taking applications will also definitely be useful. I hope that during my internship I will learn how to use many useful applications and technologies that will help me acquire knowledge.

During the trip, technology will allow us to capture many moments, knowledge and experiences by taking photos and recording videos, so that after the internship we can share them with others.

Democracy

Expanding my knowledge about the European Union and democratic values is one of the main priorities of my participation in the Erasmus+ project.

Participating in mobility will enable me to better understand how the EU works through direct contact with people from different countries and learning about other civic perspectives.

I intend to use the experience and knowledge I have gained after my return, sharing it with others and promoting active citizenship and European values.

Thank you for your attention
